About the Major Projects Inventory

The BC Major Projects Inventory (MPI) contains summary information on major projects in the Province of British Columbia, Canada, that are over \$15 million (Cdn.) capital cost, or \$20 million in the Lower Mainland–Vancouver area.

As of September 2004, the information in this published version of the BC Major Projects Inventory continues to be prepared by Jackie Hamilton & Associates, although it is now owned and published by the Province of British Columbia.

Sources of MPI Information

Information sources include print and electronic media, developers, architects, general contractors, and government agencies (provincial, regional, municipal) as well as occasional site visits. Projects that are under consideration or proposed to be funded by the Provincial government may be listed where there is public information about such projects. The description may indicate the status of Provincial funding applications, if it is known.

Project Location

Projects are listed according to eight regions: Vancouver Island/Coast, Mainland/Southwest (Vancouver area), Thompson/Okanagan, Kootenay, Cariboo, North Coast, Nechako, and Northeast. Maps showing the location of the regions and main population centres are included in the MPI. Projects are also listed according to the nearest population centre, which could be an unincorporated centre or a local government, e.g., a municipality.

Updates

New projects are added to the database every quarter. Projects already in the database are updated, at minimum, every six months unless there is no expected change in status for a longer period of time. Projects may be shown as updated with no change in information—this means that the information shown is still valid according to the verifying source.

Estimated Costs

Cost estimates are general estimates from the information sources used.

Start and Finish Dates

Start and finish dates for proposed projects are based on estimates from the sources used, or in some cases, on reasonable assumptions. These dates are revised as new information becomes available.

Project Status

Projects are listed by status: proposed, under construction, completed, or on hold. Notes on other status indicators are also included in the project description. Projects that are on hold for longer than two years are normally removed from the publication (although retained in our database). Cancelled projects are noted in the project descriptions as cancelled, then removed from the next issue of the MPI.

Sustainable Building Design

As a new feature, the Major Projects Inventory has begun identifying sustainable building design and construction projects within the Inventory that have been registered and certified under a recognized green building rating system (e.g., LEED®, Green Globes). Certification provides greater assurance that a building will be an environmentally responsible, energy efficient, profitable, and healthy place to live, work and play. This designation has been added to the project description to promote awareness of the benefits of green buildings.

Highlights of the March 2009 Issue

This issue of the BC Major Projects Inventory lists 46 new proposed projects over \$15 million for the first quarter of 2009, with available capital cost estimates totaling approximately \$2.9 billion in potential new capital investment, if all the projects proceed. The majority of proposed new projects, that is, 39 projects totaling \$2.2 billion, are publicly funded.

Fifteen major projects started construction in the first quarter, with an estimated value of approximately \$3.6 billion. The largest project started was the \$2.46 billion Gateway Program: Port Mann Bridge/Highway 1 Improvements in the Langley to Vancouver area. Another project was the \$300 million Hudson residential development in Victoria.

Twenty-six projects completed construction in the first quarter, with an estimated capital cost of approximately \$1.4 billion, the largest being the \$350 million Shangri-La Hotel and commercial development in Vancouver, and the \$244 million in Fortis BC's electricity system upgrades near Trail.

All capital costs are estimates, and therefore, subject to changes, especially in the early stages of a project proposal. Some capital costs are not included because they were not available at press time, or the developer/owner requested that no capital cost be shown.

The capital cost of all major projects currently under construction in BC is estimated at \$63.2 billion, up from \$60 billion in the fourth quarter of 2008. Many major project proposals listed are in very preliminary stages and are not approved for construction; therefore, capital cost estimates should be viewed with caution. The available capital cost of proposed projects is estimated at approximately \$102.7 billion, down from \$105 billion in the previous quarter. Approximately \$18.3 billion of projects are judged to be 'on hold' for the time being.

Kitimat to Summit Lake Pipeline

Pembina Pipeline Corp. Ph: (403) 231-7500

Project includes construction of a marine terminal in Kitimat and a 465 km pipeline with the capacity of 100,000 barrels/day of imported condensate to Summit Lake near Prince George where it would connect with Pembina's existing Western Pipeline System for transfer to Edmonton. The proposal includes four new pumping stations. Public open houses were held in Jun 2006. Federal and Provincial Environmental approvals have been received. A \$200-million cost increase on the project is largely due to the addition of a 60-kilometre looping line between Taylor, B.C. and Judy Creek, Alta. Website: www.pembina.com

Kitimat LNG Terminal

Kitimat LNG Inc. Ph: (403) 264-3330

A liquid natural gas terminal at Bish Cove, 18 km south of Kitimat, to include facilities for marine offloading, LNG storage, natural gas liquids recovery, re-gasification, and send-out facilities to deliver natural gas into the Pacific Natural Gas (PNG) pipeline. A new 14 km, 30 in pipeline would connect from the facilities to the PNG line. Send-out capacity is proposed at 610 MMcf/day. Project has received approval under the BC Environmental Assessment Act. Federal approval has been received. Front-end engineering and design (FEED) study is complete and engineering, procurement and construction (EPC) bid packages released in Early 2007 to a short list of three companies. Construction has been delayed until adequate supply contracts have been secured.

Enbridge Pipelines Inc. Ph: (780) 420-5210
 Proposed 30in/400 kbpd, 1,200 km bitumen export pipeline from Edmonton, Alberta to deliver crude oil to the deep water port at Kitimat. The pipeline would deliver above 400,000 barrels/day to a tank farm for storage prior to shipping to California and the far east. Preliminary engineering and environmental overviews are completed. A second, parallel 20in/150-200kbpd, 1200 km import pipeline will also be built to ship condensate to the oilsands (see project id 1413). Approx 2000 construction jobs are expected. Project cost is estimated for BC portion. The application to the National Energy Board was filed in Summer 2006. In 2006, Enbridge delayed the project construction start to focus on eastern pipeline projects but is now reactivating the project, and is currently conducting open houses in communities along the proposed pipeline.

Atlin**New Polaris Gold Mine**

Canarc Resource Corp. Ph: (604) 685-9700

Reactivation and expansion of a former underground gold mine approx 100 km south of Atlin and 60 km east of Juneau, Alaska. Re-modeling, metallurgical testing and engineering of a portion of the gold resources, necessary for a 65,000 opy high-grade underground gold mine, is underway. A scoping study identified the potential to develop a 65,000 oz/year to 100,000 oz./year high grade, underground gold mine over the next three years. New office and refurbished camp complex now on site. New mine resource estimate released on Feb 2007 and the mine plan is expected to complete in Spring 2007. A feasibility plan and environmental studies will be carried out prior to government permitting. Website: www.canarc.net

Dease Lake Area**Turnagain Nickel Project**

Hard Creek Nickel Corp. Ph: (604) 681-2300

Proposed nickel mine located 70 km east of Dease Lake. An updated Preliminary Assessment (PA) of the Turnagain deposit by engineering firm AMEC Americas Limited showed positive economics with a potential 29 year mine life, producing an average of 20,397 tonnes of nickel per year. The ore would be processed through an on-site concentrator and hydrometallurgical process facility that would produce nickel, cobalt and copper precipitation products. Project is in the pre-feasibility stage and will require review under the Environmental Assessment Act.

Fort St. John**Peace River Site C Dam**

BC Hydro Ph: (250) 785-3420
Site C is a potential third dam and 900 megawatt hydroelectric generating station on the Peace River approximately 7 kilometres southwest of Fort St. John. It would be capable of producing approximately 4,600 gigawatt-hours of electricity annually - about 8 percent of BC Hydro's current electricity needs. Site C would deliver firm electricity with a high degree of flexibility. Site C was examined as a resource option over 25 years ago, however much more research and consultative work remains to be done, including technical work to bring existing information up to date. A multi-stage review process has been established for looking at Site C. Stage 1, which involved a high level review of existing information, has been completed. Stage 2 of the review, which includes extensive consultations with First Nations, the public, and other jurisdictions, is underway. If the review moves beyond Stage 2, subsequent stages would include investigations to support an application for an Environmental Assessment Certificate and applications for other required permits and approvals. The review process leading to a decision on Site C will take about five years. A final decision by government on whether to proceed will be made when all aspects of the project are fully understood. If approved, construction would take about seven years. Capital cost listed is an interim project cost estimate reported by BC Hydro in Dec 2007.

STATUS: ON HOLD

Tumbler Ridge**AES Wapiti Power Project**

Hillsborough Resources Ltd/AES Pacific Inc Ph: (604) 684-9288
 The energy generation project would include a 184 MW thermal electric power plant and a 35 kilometre, 230 kV transmission line, and would have a contemplated project life of at least 40 years. Fuel for the energy generation facility would be supplied by the Wapiti coal mine for which regulatory approvals are being sought by Hillsborough (see separate entry - Wapiti Coal Mine). The power project was selected in BC Hydro's 2006 call for power; however, the project is currently on hold due to the BC government's recent policy change to require 100% carbon sequestration for any coal-fired project.
